

Maybury can provide a wide range of standard and custom vacuum lifters, offering material handling solutions for all applications. Vacuum systems can accommodate loads up to 4000 lbs. and above. Maybury can help you select the right lifter, system or component for your needs.

Vacuum Tube Lifting Systems

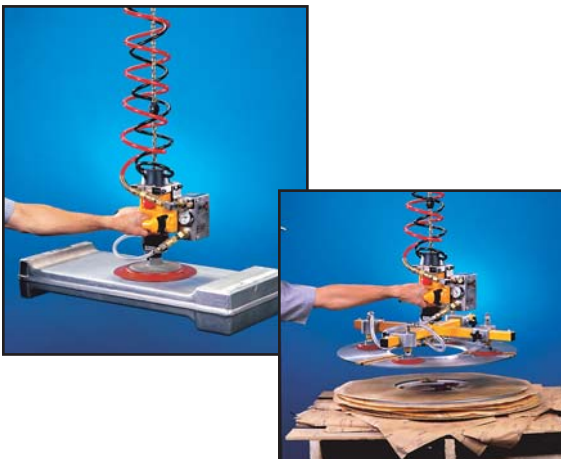

Anver VT Series Vacuum Tube Lifting Systems are ergonomic lift assist devices designed for high production use. With their continuous duty cycle, unlimited starts and stops per minute are possible, and the vacuum attachment to and release of the load is instantaneous. Standard VT Systems are available with lift tube diameters of 6.3" for the Model VT160 Vacuum Tube Lifter, 7.1" for the Model VT180 Vacuum Tube Lifter and 7.9" for the Model VT200 Vacuum Tube Lifter.

- Corrosion resistant control head, handle and control knob, manufactured with electro-polished heavy gauge stainless steel
- Easy operation allows effortless handling of virtually any load
- Load lifting capacity of up to 650 lbs.
- Lifting Systems can be configured to handle all load types: porous, semi-porous and non-porous

Tube Lift Systems

- Super-smooth operation via an improved Conical Flow Valve for precise control, even with light loads
- Exclusive vacuum gauge on front of head indicates safe lifting capacity
- Systems come equipped with Siemens® pumps, including the latest extra-quiet direct drive models. Pump sound level is 70 dB with a 19" hg vacuum
- Highly polished, heavy gauge stainless steel construction throughout
- Top swivel features vacuum-tight, totally sealed bearing for 360° rotation

Ergonomic Systems

- A compact, easy to use integrated lift system for small load handling
- Perfect for loading products into boxes where high airflow is not required
- High vacuum level (27" hg) is perfect for loads with limited surface areas
- Instantaneous attach/release as vacuum is at the head
- Quick disconnect feature is standard and allows fast pad attachment changes in seconds, plus a 359° rotation
- Electric up/down hoist is available with compressed air or electric powered vacuum
- Hundreds of pads available for custom head building
