

Maybury Mezzanines increase usable floor space at a fraction of the cost of new construction. These freestanding structures can be easily relocated or modified as needs change.

Maybury[®] Mezzanines

- Capacity of 125-250 pounds per square foot; uniformly distributed load
- "Nut and bolt" construction for easy installation
- Meets OSHA or IBC standards
- Constructed with ASTM A572-50 I-beams and ASTM-A500 Gr. B structural square tube columns
- 1-1/8" thick, 2-sided tongue and groove exterior grade plywood decking or open steel plank grating
- Other options available

Each mezzanine includes one set of open or closed riser stairs, guardrails for the entire perimeter of the mezzanine, full installation drawings and decking layout.

Maybury can furnish custom-designed mezzanines in any size and capacity with many different options. Please contact your sales representative for more information.

Maybury Material Handling engineers and fabricates many different custom structures. In addition to mezzanines, Maybury can furnish you with machine guards, stairways, platforms, rails and more.

Maybury[®]
Custom Fabrications

Once Maybury Material Handling's Systems Engineering Department has drafted a project blueprint, our Fabrication Department then begins construction of the product application. From simple OSHA-compliant guardrail to sophisticated mezzanine structures, Maybury's Fabrication Department can custom build many products to fit your needs. With our team of certified welders you can rest assured knowing that your items are of high quality.

Pick out your colors. Our large state-of-the-art paint booth is of the same quality as an automotive body shop. We can custom match paint colors to your liking.

Maybury's Fabrication Department works closely with our talented Installation crew to make sure our customers are completely satisfied with the end product.
