

High-Speed Roll-Up Doors

Maybury Material Handling has the knowledge and experience to outfit your individual application with a custom-designed DYNACO roll-up door. Contact Maybury for a consultation and discover how a DYNACO door can improve the safety and efficiency of your operations.

DYNACO[®] High-Speed Roll-Up Doors

DYNACO rapid roll-up doors and high-speed dock doors effectively address issues such as security, heavy drafts, frequent accidents, noise pollution, vehicle transportation speeds and climate and contamination control. DYNACO doors improve productivity, improve material handling and reduce energy losses between conditioned environments, all at a low maintenance cost. DYNACO guarantees that all of its rapid-roll doors and high-speed doors are self-repairing. These crash-forgiving doors automatically repair with the push of a button and are resistant to high winds, compatible with your traffic flow and tight sealing.

Regardless of your industry, DYNACO considers safety first. All DYNACO fabric rapid-roll-up doors are made with an ultra-safe flexible fabric curtain which will gently mold to any object or person it contacts. All DYNACO fabric high-speed doors can be easily modified to meet the specific needs of your industry. DYNACO manufactures the following high-speed doors:

- Self-Repairing Doors
- Freezer Doors
- Cold Storage Doors
- Clean Room Doors
- Food Industry Doors
- Crash-Resistant Doors
- Wind-Resistant Doors
- Airport Hangar Doors
- Metal Industry Doors
- Automobile Industry Doors

Chase Doors

Chase Doors is the world's oldest, largest and most progressive manufacturer of impact traffic doors. Also referred to as swing doors, double-acting doors, industrial doors, solid core doors and bump doors, our doors are tailored to suit many different markets, including supermarket, retail, restaurant, industrial, pharmaceutical, food processing, institutional and postal. Our well-known brands include Durulite[®], Saino[™], Proline[™], Chase[™], AirGard[®], and Econo Max[™]. In addition to double-acting traffic doors, Chase also produces service doors, flexible doors, strip doors and PVC roll goods, postal doors, corrosion-resistant doors, sliding fire and sliding service doors. Chase has earned a reputation for manufacturing high-quality products that are both reliable and durable, at the best prices, with the shortest delivery times available.

Double-Acting Traffic Doors

Flexible Doors are a cost-effective way to provide a swing door in openings for heavy traffic applications. Top-mounted gravity-operated hinge system allows the door to open fully and close automatically, allowing easy access and conserving energy. These doors are easy to install and virtually maintenance free. Door panels are constructed of 45 oz. USDA-accepted, abrasion-resistant, vinyl-coated nylon material.

Sliding Doors

Designed for high-cycle, abusive applications, the heavy-duty ColdGuard horizontal sliding door includes a permanently lubricated roller track system and molded polymer casings. All horizontal door systems are available manual or motor operated. Standard 4" thick and optional 6" (for applications below -20°F) doors are available.

Swing Doors

Single- or double-panel ColdGuard Swing Doors provide simple, time-tested sealing and hinge systems for maximum performance in any application. ColdGuard Swing Doors are suitable for interior and exterior applications. They incorporate the same FRP perimeter framework that makes our sliding doors superior to competitive products.
