TAYLOR-DUNN

Commercial and Industrial Vehicles Since 1949

Utility Vehicles

Taylor-Dunn's complete line of electric-powered burden carriers, personnel carriers, tow tractors, and other utility vehicles is available from Maybury. Their reliability and durability make Taylor-Dunn vehicles "The Best Way to Go About Your Business."

When versatility in load capacities, optional configurations, and performance is paramount to running your operations efficiently, you need to look no further than Taylor-Dunn's line of burden carriers. Taylor-Dunn burden carriers handle loads up to 5,000 lbs. and can tow loads up to 17,500 lbs. With their unitized bodies, manufactured from 16-gauge steel, and an automotive differential acting as the foundation to their strength and reliability, Taylor-Dunn is the perfect answer to your material handling needs.

Electric Burden Carriers

Taylor-Dunn's line of electric Burden Carriers is designed for tough industrial applications yet affordably priced. Taylor-Dunn offers a wide range of options to satisfy any application, or you can customize trucks to fit your exacting needs and specifications.

- Capacities range from 800 to 5,000 lbs
- Greater cost savings than internal combustion vehicles
- Choose from five versatile models
- Quiet, environmentally friendly, efficient vehicles

Gas-Powered Burden Carriers

Taylor-Dunn understands that there are times when specific applications require longer run times than are available in an electric burden carrier. In addition to our flagship G1-50 internal combustion burden carrier, the Kalamazoo line of speed trucks was acquired to strengthen this product line.

- Wide variety of options and accessories available
- Capacities ranging from 2,000 lbs to 6,000 lbs.
- Speeds from 7-1/2 mph up to 25 mph
- Optional features on the K-45F/60F include driver half cab with door, heater/defroster, and mirrors

Utility Vehicles

Specifically designed to meet the needs of special or outdoor applications, Taylor-Dunn utility vehicles offer practical engineering matched with optimal performance. Taylor-Dunn utility vehicles will get you there safely and quickly, all the while reducing your operating and maintenance costs.

- Speeds up to 25 mph
- Load capacities up to 3,000 lbs.
- Four versatile options
- Cost-effective to own and operate
