

*In-plant offices from Maybury provide attractive, functional enclosed spaces, without the costs and disruption associated with conventional construction.*

### Starrco Modular Offices

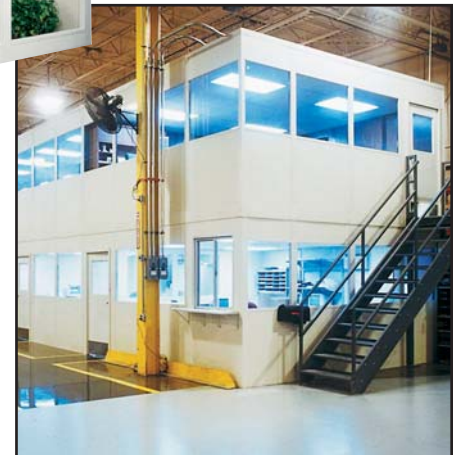

Starrco pre-engineered modular office systems provide flexible solutions to fit your ever-changing needs. Pre-fabricated office buildings are completed in about 25% of the time of permanent construction. A modular building can often be installed over the weekend, ready for occupancy on Monday.

From a single office to a two-story multiple office system, no job is too small or too large. Room dividers can be constructed for modular offices such as:

- Administrative offices
- Shipping and receiving offices
- Cafeterias and break rooms
- Conference rooms
- Sound, paint and dust enclosures
- Plant foreman's office
- Computer and engineering labs
- Two-story offices

Starrco modular office systems are pre-engineered and manufactured to precisely fit your application. All materials come completely finished and require no sanding or painting. Starrco's wide variety of materials, finishes and colors allow owners, architects and contractors the freedom to design offices from high-profile administrative offices to industrial applications.

In-plant modular offices can be completely dismantled, relocated and reassembled. Therefore they can be depreciated over seven years as opposed to the 39 years required with permanent construction. This difference results in an immediate reduction in taxes and saves you money.

### Portable Buildings

Starrco pre-assembled portable buildings are ideal for both interior and exterior use. Let Maybury custom design a modular building to meet your specific need. Starrco's pre-fabricated buildings are designed to provide years of maintenance-free service. The structural members are either anodized aluminum or steel with a rust retardant finish. The ceiling, floor and walls have a solid impact-resistant core with a durable aluminum or vinyl covered finish.

Starrco's portable buildings function as kiosks, airport taxi dispatches, parking, ticket and toll booths, security guard houses, airport rental car offices and portable offices.
