KEY FEATURES

Ō\$\$

Machine Control Panel uses off-theshelf toggle and marine duty switches featuring universal icons which simplifies training.

Vacuum Muffler allows machine to consistently achieve as low as 70 dBA while thoroughly drying the floor.

Squeegee Adjustments made simple tool-less maintenance of the squeegee blade.

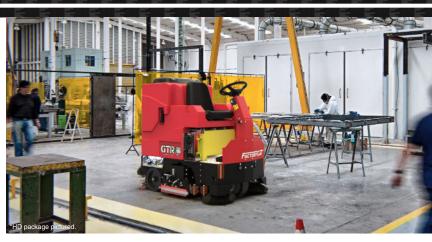

Fill System features a retractable hose for easy filling on standard sink-faucets and a stainless screen for bucket filling.

Oversized Vacuum Screen Shut-Off quickly arrests overfill issues to protect the Vacuum Motor.

High Performance motors and down pressure provides an unmatched standard of cleaning.

TANK TIPS BACK FOR EASY ACCESS

*HD package pictured.

RECOVERY AND VAC BOX

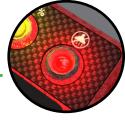

Water from rear squeegee travels through this hose into the recovery tank.

When the tank becomes nearly full a red indicator light in the dashboard turns on.

The Drain Saver Basket collects debris so it doesn't clog floor drains.

White Filter captures fine particulate.

When the squeegee clogs a red indicator light in the dashboard illuminates.

Airflow is drawn through this hose. Any water from this point will travel to the Yellow Vac Box.

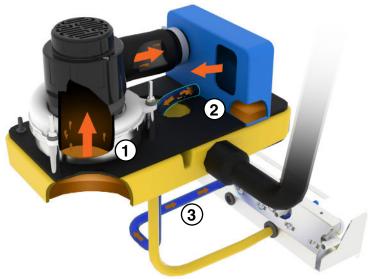

Stainless Steel Baffle keeps foam on left _____ side, and away from the vac screen intake. As the tank fills, the Float Ball rises until it is sucked into a sealed position, cutting off airflow to the vacuum motor and triggering red dash light.

Vac Box Unloader

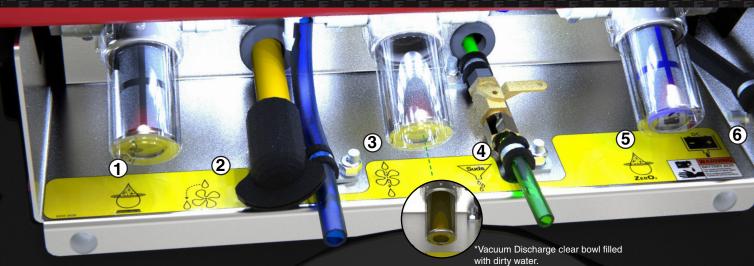

- 1. If dirty solution bypasses the Vacuum Filter Screen & White Filter, it will flow into the Yellow Vac Box.
- 2. The water stays in the Yellow Vac Box chamber due to vacuum pressure and only flows out when the vacuum turns off.
- 3. After shutting off the vacuum, any dirty water inside the Yellow Vac Box flows down to the Service Cabinet and out the unloader valve.

Vacuum Discharge

- 1. In the rare case the Yellow Vac Box overfills, water will pass through the motor.
- 2. Water passing through the Vacuum Motor exhausts in the Blue Reservoir where it will drain down to the Service Cabinet.
- 3. On the Service Cabinet, a clear bowl shows water has passed through the Vacuum Motor. There is an overflow hose so that extra water flows freely out the blue drain hose.
